DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 1 and 16 recite terminal connections for the first through fourth transistors that are specific to the embodiment shown in Figure 4a; however, dependent claims, such as 3-7 and 19-23, recite limitations that are drawn to Figure 3a. The specification discloses no drawings which support a structure which is a composite of Figures 3a and 4a as described therein. Further, the present claims also appear to describe structures with the same power supply connected to both the drain and source terminals of recited transistors. More particularly, Figure 3a depicts the third power supply as being equal to Vdd so, for embodiments corresponding to Figure 3a, the circuit would not operate, seemingly, if the transistors having their drain source path connected to Vdd on one side also had the same path connected to Vdd on other side. Likewise, Figure 4a depicts an embodiment wherein the third power supply is equal to Vss so, similarly, the same problem exists in terms of support for those embodiments reciting source/drain paths of transistors with both ends connected to the same power supplies. The specification does not support such hybrid embodiments nor does it disclose how it would function.

Claim Objections

Claims 1 and 16 are objected to because of the following informalities: The phrase "means to apply a second output voltage from next shift register stage

Art Unit: 2816

concurrently to gate terminals of each of said fourth transistor" in claim 1 and the corresponding text in claim 16 are not grammatical. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 and 18-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 16, the following terms lack a clear antecedent basis or are claimed repetitively: "a first control line", "the second terminal", "the first transistor", "the drain", "the second transistor", "the source" and "the third transistor."

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
